

WEBSITE & EXPERIENCE · FOR THE BUILD TEAM

KAYAN

The Experience

The website and portals for kayanwork.com — why it exists, who it is for, how it looks and moves, and everything beneath it. The public site, the freelancer portal, the client portal with the sponsor experience folded in, the ready-products catalogue, and Kayan for Yemen — specified so the team that builds it inherits a whole experience, not a wireframe.

Document	Domain	Covers	Brand
KAY- WEB-001 · v1.0	kayanwork.com	Public site · Portals · Products · Tech	Provisional; Phase F finalises

· Why this site exists

The website is not a brochure for Kayan. It is the place where Kayan's central claim becomes something a person can see, trust, and act on: the talent was always here; the system was not; now it is. Most institutional sites describe. This one has to prove, in a market where trust is scarce and hope is scarcer, and it has to turn a visitor into a participant before they leave.

IT DOES THREE THINGS BEYOND WHAT AN INSTITUTIONAL SITE USUALLY ATTEMPTS

The job	How the site does it
Make the invisible visible	Yemeni talent, delivered work, and community hours are real but unseen. The site renders them — a living talent map, a public delivery record, a give-back count — so that evidence, not assertion, carries the argument. Data becomes hope.
Turn visitors into co-builders	No one is marketed at. The first talents, clients and sponsors are named as the people who built Kayan. A visitor is invited into the institution, not asked to consume it.
Hold the relationship, not just win it	The site does not end at a lead. It opens into portals where a freelancer grows and a client is served — the place the relationship lives, deepens, and compounds over years.

AND THREE THINGS IT DELIBERATELY IS NOT

1. Not a catalogue of claims. Every claim meets its proof on the same screen.
2. Not a funnel that manipulates. No dark patterns, no false scarcity; trust is the product and cannot be faked.
3. Not a foreign template. It reads as a Yemeni institution speaking to its own people, Arabic-first, and it works on the connections they actually have.

Data becomes hope. *The single most important thing this site does is render the invisible — talent, delivered work, community hours — as something a person can watch happening. Evidence, moving, is the argument.*

Who it is for

Six people arrive with different fears and hopes. The site is built around their journeys, not around Kayan's org chart. Each leaves having done one clear thing — and feeling something specific.

Who	What they are asking	What the site does for them	What they should feel
A young person with skills	Is this real? Can I trust it? Is there something here for someone like me — a woman, someone outside Aden, someone abroad?	Sees the map and people like them on it; understands how they would be verified; registers in minutes, from the site or a WhatsApp link.	Confidence that this is real, and hope that it is for them.
A client with work to get done	Can I rely on this, or will it vanish like the last freelancer? What can they actually deliver? Is my money safe?	Sees delivered work, picks a ready product or describes a need, and learns their payment is held safely until they accept the work.	Certainty and protection.
A Yemeni abroad	How do I help home with more than money? Can I trust the channel? Will my contribution build something?	Commissions work from a verified team at home, or funds a cohort, and sees the result reported.	Trust that their contribution builds capacity, not dependency.
A sponsor or funder	What exactly will my money build, and how will I know it worked?	Chooses a cohort or a community project to back, inside the client environment, and receives a reported line from their money to a real outcome.	A credible, evidenced return on their giving.
Someone who wants to give back	How do I contribute a skill, and what do I get for it?	Finds community projects, gives verified hours, and earns standing — a card tier and points, never money.	Belonging and recognition.
A government or local authority	Is this a credible, non-partisan youth and employment effort we can support?	Sees verifiable evidence of youth capability and real placement outcomes, framed on jobs and community.	Assurance and a genuine planning asset.

The experience principles

Seven principles govern every screen. They are the difference between a site that is merely modern and one that earns confidence and gives hope in a place where both are scarce.

Principle	What it means in practice
Confidence through evidence	No claim stands alone. The map, the delivery record, real named people, and plain answers about how Kayan works sit beside every promise. Proof is the design system's first material.

Principle	What it means in practice
Hope through visibility	The map filling, the country lighting as hours are given, the delivery record growing — the site turns Kayan's progress into something a visitor can watch happen. Rendered evidence is the argument for hope.
Participation over consumption	The interface invites building, not browsing. You join, you bring a brief, you fund, you give — and you are named for it. The default posture is active, not passive.
Calm over noise	Generous space, one idea per screen, restrained and purposeful motion. The site feels like a place to think, not a place being sold to you. Calm is itself a trust signal.
Trust in a low-trust context	Radical clarity about how Kayan works and what it costs; payment protection explained in plain words; no manipulation, no hidden terms. In a market burned by broken promises, transparency is the differentiator.
Dignity and inclusion by integration	Women, people with disabilities, people outside Aden and abroad appear as talent doing work — never as categories in a diversity strip. Inclusion is shown by who is present, not by labels.
Reach reality	It works on a mid-range Android over a weak connection in Aden. The rich motion and depth are an enhancement layered on a fast, functional, accessible baseline — never a barrier to it. Performance is a design constraint of the first order, not a final polish.

The architecture

A public site that proves and invites, three doors that turn a visitor into a participant, and two authenticated environments where the relationship lives — the freelancer's space and the client's delivery, with the sponsor experience folded into the latter.

Page / environment	Route	Purpose
PUBLIC SITE		
Home	/	The scroll-told thesis: the talent was always here; the system was not; now it is. One clear door per audience.
The Map	/map	The living verified talent map — the proof surface and the reason to register.
How Kayan Works	/how	The model in plain language: verification, teams, and how payment is protected — no internal jargon.
Managed Delivery	/managed-delivery	The line that runs the work and stands behind it — its identity, its proof, its door.
The Hub	/hub	Where Aden works — the place, the connectivity, the belonging; book a visit.
Kayan Forge	/forge	Where skill is made — learn, prove, and reach real work.
Ready Products	/products	The catalogue: fixed scope, fixed price, named timeline — choose, fund, start.
Kayan for Yemen	/k4y	The civic arm — give back, sponsor a cohort, and the give-back count.
Proof	/proof	The public delivery record and the impact story — evidence, gathered.
About & Trust	/about	Who Kayan is, how it is governed, and why it can be trusted.
Contact	/contact	WhatsApp-first, with the Hub on the Corniche and simple hours.
THE DOORS (actions)		
Join as talent	/join	The registration journey — from the site or a WhatsApp deep link.
Start a brief	/start	The client's intelligent intake — describe a need, or choose a product.
Sponsor	/sponsor	The sponsor's entry — choose what to back; opens into the client environment.
FREELANCER PORTAL — 'Your Space'	/space	The talent's home, where the working relationship lives (authenticated).

Page / environment	Route	Purpose
CLIENT PORTAL — 'Your Delivery'	/delivery	The client's home, with the sponsor experience folded in (authenticated).

1 The design language

One coherent system with a dimensional, crafted feel — depth, light, and purposeful motion — that reads as elite and calm, never busy. The base is dark and quiet so that light and colour mean something; gold is the single thread that ties the whole together; and each line carries its own accent and character within the one system. The visual brand — exact palette and type — is provisional here and finalised in Phase F; what is fixed is the K mark, the promise, and the experience doctrine below.

THE PALETTE

Provisional working values; Phase F finalises. Held as tokens so the brand can change without touching structure.

Role	Token	Intent
Base / ink	PH-COL-INK	The dark, quiet ground the whole site rests on. Working value: deep teal-ink.
Signal / gold	PH-COL-GOLD	The single thread — highlights, the mark, the moment of arrival. Working value: warm gold.
Managed Delivery accent	PH-COL-MD	Steel-blue precision.
The Hub accent	PH-COL-HUB	Warm amber light.
Kayan Forge accent	PH-COL-FRG	Ember orange.
Kayan for Yemen accent	PH-COL-K4Y	Living green.
Paper / light	PH-COL-PAPER	The rare bright surface, for focus and forms.

THE TYPE

Role	Token	Intent
Display	PH-FONT-DISPLAY	The voice of arrival — headlines, the thesis, the moments.
Text	PH-FONT-TEXT	The workhorse — readable Arabic-first, calm, generous.
Mono/mark	PH-FONT-MONO	For data, the ledger, the counts — where numbers should feel exact.

THE MOTION DOCTRINE

Principle	What it means
Motion means emergence	The signature feeling is things coming into being — a mark assembling, pins lighting, a team forming, a count rising. Motion tells the story of a system coming to life, never decorates a static page.

Principle	What it means
Calm and deliberate	Easing is slow-in, settled-out; nothing snaps or jitters. The pace is confident. One thing moves at a time; the eye is led, never scattered.
Motion earns its place	Every animation carries meaning — it reveals evidence, guides an action, or rewards a step. If a motion says nothing, it is cut.
Scroll is narrative	The homepage is a story told by scrolling: the talent was always here, the system was not, now it is, behind every success a Kayan. Scroll advances the argument, section by section.
Depth over flatness	Layered planes, gentle parallax, and considered shadow give the site a sense of space and craft — a dimensional stage, not a flat page — used with restraint so it reads as quality, not spectacle.
Respect the person	Motion honours reduced-motion preferences and never blocks content or hijacks scroll. The experience degrades gracefully to something still beautiful and fully functional.

Motion means emergence. *The site's signature feeling is things coming into being — a mark assembling, pins lighting, a team forming, a count rising. Motion tells the story of a system coming to life; it never decorates a static page.*

THE THREE-DIMENSIONAL LAYER

Principle	What it means
Meaningful, not everywhere	Three dimensions are used where they carry the idea — the K mark as an object that assembles, the talent map as a surface with depth, the trust ladder as a climb — not sprinkled as effect. Gratuitous WebGL is refused; it would cost the reach the mission depends on.
Tiered by capability	A capable device on a good connection sees the full dimensional experience; a constrained one sees a graceful, still-elegant fallback — a static or lightly-animated version of the same scene. The tier is detected and chosen for the person, silently.
The hero objects	Each line has a single dimensional hero object that embodies it — the pod assembling, the Hub room waking, the forge spark becoming form, the country lighting. These are the site's memorable, ownable moments.
Built to a budget	Any three-dimensional scene ships within a strict weight and performance budget; it is lazy-loaded, paused when off-screen, and never on the critical path to content.

THE SONIC LAYER

Kayan's sonic signature is part of the identity, and the site is where it is first heard. It is offered, never forced: the experience is complete in silence, and sound is an invited layer a person switches on. When invited, the mark resolves to the signature on arrival, and key moments carry a restrained sonic cue. Audio never autoplays; consent and control are absolute.

ACCESSIBILITY AND REACH, BUILT IN

1. Arabic-first and right-to-left by design, with an English twin; every component is built RTL-native, not mirrored as an afterthought.

2. Meets recognised accessibility standards: full keyboard operation, sufficient contrast, real focus states, and screen-reader semantics.
3. Honours reduced-motion and reduced-data preferences; the dimensional and animated layers step aside on request.
4. Legible on a small, bright screen in sunlight; type, contrast, and target sizes are set for a phone held outdoors in Aden.

2 An identity for each line

One system, four characters. Each line carries its own accent, hero object, and motion feel within the whole — so a visitor knows which line they are in by how it moves, not only by what it says.

Managed Delivery

“We run the work, and stand behind it.”

ESSENCE

Precision, accountability, assembly.

HERO OBJECT

A team assembling — separate points converging into one accountable unit, then a finished piece delivered into a growing record.

MOTION CHARACTER

Deliberate and engineered; elements click into place on a grid; the feeling of a machine that works.

ACCENT

PH-COL-MD

SIGNATURE MOMENT

The delivery: a completed project sliding into the public record, counted.

The Hub

“Where Aden works.”

ESSENCE

Warmth, place, gathering, belonging.

HERO OBJECT

A warm-lit room on the Corniche coming to life — light blooming, tables filling, the café glowing.

MOTION CHARACTER

Soft and ambient; a gentle breathing parallax; light that warms as you arrive; calm that says you can work here.

ACCENT

PH-COL-HUB

SIGNATURE MOMENT

The room waking; lights coming on across an empty space until it is full and alive.

Kayan Forge

“Where skill is made.”

ESSENCE

Craft, heat, ascent, making.

HERO OBJECT

A spark becoming a forged form; raw material worked into something finished; a rising line.

MOTION CHARACTER

Kinetic and upward; heat-shimmer and sparks; energy building; the sense of something being made and rising.

ACCENT

PH-COL-FRG

SIGNATURE MOMENT

Raw to forged: a rough shape resolving into a crafted one as a learner rises a tier.

Kayan for Yemen

“A hand for the city.”

ESSENCE

Community, country, pulse, giving.

HERO OBJECT

The map of Yemen lighting governorate by governorate as hours are given; a steady human pulse.

MOTION CHARACTER

A heartbeat; things accumulating and lighting; warm, hopeful, human; the country coming aglow.

ACCENT

PH-COL-K4Y

SIGNATURE MOMENT

The country lighting: regions warming into light as the give-back count rises.

3 The public pages

Each page specified as the team will build it: its purpose, who it serves, the modules it holds, how it moves, the proof on it, the one action, and the data behind it.

/

Home

For: All · Land the thesis, prove it in the same breath, and give each audience one clear door.

MODULES

Arrival: the K mark assembles to the sonic signature (offered); the promise resolves — Behind every success, a KAYAN.

The thesis, scroll-told: 'The talent was always here.' → 'The system was not.' → 'Now it is.' Each line a screen, each with a proof beneath it.

The living map, in miniature: pins lighting across Yemen — a taste of the full map, and a door to it.

The three lines, each a dimensional tile with its own accent and hero-object motion on approach.

The delivery record, ticking: real completed work, counted — proof, not promise.

The give-back count: hours given, projects delivered, the country lighting.

The three doors: Join as talent · Start a brief · Sponsor — one primary action each, unmistakable.

The Founders' line: the people who built Kayan, named.

MOTION

Scroll-driven narrative; the mark assembly; map pins lighting; per-line hero objects on approach; counts rising into view.

PROOF The map, the delivery record, the give-back count, and named founders — all on the home screen.

ACTION Three doors, one per audience.

DATA Map summary, delivery-record count, give-back count, founders list — all live from the platform.

/map

The Map

For: AUD-TAL, AUD-CLI, AUD-GOV · Make Yemeni talent visible and verifiable, and turn the seeing into registering.

MODULES

The full living map: verified talent by governorate and specialisation, pins lighting as verifications complete.

Filter by specialisation and region; every pin is a real, verified, position-safe profile summary.

A governorate view: its first verified talent, its crafts, its count.

The plain-language note: what 'verified' means here, and what it does not expose.

The door: get verified, get on the map — site or WhatsApp.

MOTION

Pins lighting on load and as data updates; a dimensional map surface with gentle depth; a region warming when selected.

PROOF The map is the proof — credible because registration is throttled to verification capacity, never inflated.

ACTION Get on the map (register).

DATA The verified talent map, live; privacy-safe profile summaries.

/how

How Kayan Works

For: AUD-CLI, AUD-TAL · Remove doubt by explaining the model in plain words — trust through clarity.

MODULES

Three plain questions answered: How do you know the person is good? How does the work get done? How is my money safe?

Verification shown as earning trust step by step — no internal mechanics, just what a client would recognise.

The team explained: you deal with an institution and one point of contact, not a lone contractor.

Payment protection in plain words: your payment is held safely and released only when you accept the work.

What it costs, plainly (tokenised), and what you get for it.

MOTION

Each answer assembles as you reach it; a calm, explanatory pace; no spectacle where clarity is the job.

PROOF Links to the delivery record and the map at each claim.

ACTION Start a brief · Get on the map.

DATA Static content with live proof links; costs from tokenised config.

[/managed-delivery](#) · [/hub](#) · [/forge](#)

The Three Lines

For: By line · Give each line its own identity, proof, and door within one system.

MODULES

Each line opens on its hero object and accent — Managed Delivery assembling, the Hub waking, the Forge forging.

The line's tagline and plain description; who it serves; how it works.

The line's own proof: delivered work for Managed Delivery, the space and connectivity for the Hub, graduates for the Forge.

The line's door: start a brief, book a visit, or join a cohort.

MOTION

The line's signature motion character throughout; the hero object as the page's centre of gravity.

PROOF Line-specific: the record, the room, the graduates.

ACTION The line's own action.

DATA Line content plus live proof feeds.

[/products](#)

Ready Products

For: AUD-CLI, AUD-DIA · Turn services into things a client can choose with confidence — fixed scope, fixed price, named timeline.

MODULES

The catalogue: eight families, filterable by need, sector, budget band and turnaround.

Each product a card: what you get, who it is for, the timeline, the price (tokenised), and the plain protection line.

The promise behind every product: the same team, the same standard, the same protection — whatever the price.

One action per product: choose and start, straight into the intake with the product pre-filled.

A special row for the diaspora: build-home bundles and remote-team products.

MOTION

Cards settling into the grid; a chosen product lifting toward the intake; calm, retail-clear.

PROOF Each product links to comparable delivered work in the record.

ACTION Choose. Fund. Start.

DATA The live ready-products catalogue register.

/k4y

Kayan for Yemen

For: AUD-VOL, AUD-SPO, AUD-GOV · Carry the civic mission: give back, sponsor, and see the country light up.

MODULES

The give-back count, large and live: hours given, projects delivered, the country lighting.

For a volunteer: how to give a skill, and what standing it earns — a card tier and points, never money.

For a sponsor: cohorts and community projects to back, each with its outcome; opens into the sponsor experience.

The community record: projects delivered, named for their sponsors and their volunteers, with consent.

The plain civic line: youth, skills, and community — non-partisan, do-no-harm.

MOTION

The country lighting as the count rises; a warm human pulse; projects surfacing as they complete.

PROOF The community record and the give-back count.

ACTION Give a skill · Sponsor a cohort.

DATA Give-back count, community-project record, sponsor options — live.

/proof

Proof

For: AUD-CLI, AUD-SPO, AUD-GOV · Gather the evidence in one place — the delivery record and the impact story.

MODULES

The public delivery record: completed work as proof cards, continuously updated.

The impact story: verified talent, delivered work, community hours, cohorts — the year in evidence.

Named voices where consented: clients, talent, volunteers, sponsors.

MOTION

The record building; counts assembling; a calm, confident gathering of evidence.

PROOF This page is the proof, consolidated.

ACTION Start a brief · Sponsor.

DATA Delivery record and impact metrics, live.

/about

About & Trust

For: All · Establish that Kayan is a real, governed, trustworthy institution.

MODULES

Who Kayan is and why it exists — the reserved manifesto framing where it belongs.

How it is governed, and the facts that make it real (registration, standing).

The trust guarantee, in plain words.

The people and partners who build it, named.

MOTION

Restrained; this page earns trust by clarity, not effect.

PROOF Registration and governance facts; the Founders' Wall.

ACTION Contact · Join.

DATA Governance facts from config; founders live.

4 The freelancer portal — “Your Space”

The talent's home — the unique, dedicated place where the working relationship with Kayan lives and grows. It exists to make a freelancer feel seen, supported, and visibly progressing: to show them their standing, bring them work, let them give back, and hold their trajectory toward more responsibility and, in time, their own ventures.

Section	What it holds
Dashboard	Your standing at a glance — your tier on the trust ladder, your card, your active teams, your next step, and one thing to do today. The portal opens on momentum, not a menu.
Profile & verification	The five ways trust is earned, your progress on each, and exactly what would raise you to the next tier. Every piece of evidence you have given, and what remains. Progress is always visible and always earnable.
Your teams	Your current teams and the work in them; the workspace where a team collaborates; milestones and what is due. One point of contact and a clear shared space.
Calls for teams	Real client briefs you can be matched to, surfaced to you when you fit. You see the opportunity, the shape of the work, and how to put yourself forward.
The feed	Opportunities, calls, learning, Kayan news, and the wins of other talent — the community layer that makes the space feel alive and shared, not solitary.
Give back	Community projects open to volunteers, a simple way to log verified hours, and your standing earned by giving — your card tier and points, and the recognition that comes with them. Standing, never money.
Earnings	Your payouts: what has been released, what is held to a clean finish, and your history — clear, honest, and yours.
Growth	Your trajectory: where you are heading, when you would qualify for more, the Forge courses that would get you there, and — for those with a proven record — the path toward building a venture on the Kayan system.

THE FEELING TO BUILD

Every screen is built to make a freelancer feel they are advancing and belonging. Verification is framed as earning, not gatekeeping; work arrives with encouragement; giving back is honoured; and growth is always in view. The relationship deepens because the portal shows the person becoming more over time.

5 The client portal — “Your Delivery”

The client's home — where a client feels in control and protected. It holds every project from a first idea to a delivered result, shows their money held safely and released only on acceptance, and makes the whole engagement transparent. The sponsor experience lives here too, because a sponsor is a client whose deliverable is impact.

Section	What it holds
Dashboard	Your projects and their status, your money held and released, and your next action — the whole relationship on one calm screen.
Start a brief	The intelligent intake: describe a need in writing, by voice, or through a short guided exchange, or choose a ready product. It is built to draw a real scope out of a client who may not yet know exactly what they need — asking for the outcome, never a task list.
Your scope & options	Your agreed scope in plain language, and the two or three team configurations offered for it — each with its shape, its timeline, and its cost, so you choose with a clear view of the trade, never handed a single take-it-or-leave-it answer.
Delivery	Your project as it runs: the steps, what is due, the work as it is checked and handed to you, and the moment you accept and release payment. Your team and your one point of contact, always reachable.
Your record	Everything Kayan has delivered for you — your own proof, kept.
Sponsor	Fold-in for sponsors and funders: choose a cohort or a community project to back, see exactly what it will build, and receive a reported line from your money to a real outcome. The same protection and transparency as any engagement — the deliverable is impact.

THE FEELING TO BUILD

Every screen answers a client's fear with control and clarity: money visibly protected, progress transparent, quality assured before anything reaches them, and no jargon anywhere. A client leaves each visit more confident, not less.

The sponsor is a client whose deliverable is impact. *Folding the sponsor experience into the client environment is deliberate: a sponsor funds, chooses what to back, and receives the same protection, transparency, and reporting as any engagement — the outcome is a community result rather than a delivered file.*

6 Ready products

Kayan's services as things a client can choose with confidence — fixed scope, fixed price, a named timeline. Eight families; a client picks a product the way they choose anything they trust, and starts.

THE EIGHT FAMILIES

Family	What it holds	For
Digital & Web	Sites, stores, and the digital presence a business needs.	AUD-CLI, AUD-DIA
Content & Translation	Words that work — Arabic and English, written, translated, localised.	AUD-CLI, AUD-DIA
Data & AI	The data work the AI economy runs on — annotation, datasets, transcription.	AUD-CLI, AUD-DIA
Design & Brand	Identity and design that make a small organisation look serious.	AUD-CLI
Media & Video	Voice, video, and motion — the pieces that carry a message.	AUD-CLI
Business & Documents	Proposals, reports, and decks that win support and funding.	AUD-CLI, AUD-GOV
Events & Workshops	Workshops run and events managed, end to end.	AUD-CLI, AUD-GOV
For the Diaspora	Build-home bundles and remote teams for Yemenis abroad.	AUD-DIA

THE CATALOGUE

A seeded set; prices tokenised, resolved from config. New products graduate as demand and the verified bench allow.

Family	Product	What you get	Timeline	Price
Digital & Web	Business site in five days	A clean, fast, mobile-first site of up to five pages, live in five days.	5 days	PH-PR-SITE5
Digital & Web	Online store	A working store with products, payment guidance, and Arabic-first checkout.	PH-PR-STORE-DAYS	PH-PR-STORE
Digital & Web	Arabic SEO tune-up	Your site made findable in Arabic — structure, terms, and the fixes that matter.	PH-PR-SEO-DAYS	PH-PR-SEO
Content & Translation	Arabic↔English translation	Accurate, natural translation by a verified translator, to a published standard.	PH-PR-TRANS-DAYS	PH-PR-TRANS

Family	Product	What you get	Timeline	Price
Content & Translation	Website copy that sells	Persuasive Arabic-first copy for a site or a campaign.	PH-PR-COPY-DAYS	PH-PR-COPY
Data & AI	Arabic data annotation at scale	Text or image annotation to your standard, measured against a gold set.	PH-PR-ANNO-DAYS	PH-PR-ANNO
Data & AI	Transcription & subtitling	Arabic audio and video transcribed or subtitled, accurately and on time.	PH-PR-TRANSCR-DAYS	PH-PR-TRANSCR
Design & Brand	Brand in 48 hours	A logo, colours, and the basics of an identity, in two days.	48 hours	PH-PR-BRAND48
Design & Brand	Full brand identity	A complete identity system with guidelines.	PH-PR-BRANDFULL-DAYS	PH-PR-BRANDFULL
Media & Video	Professional voice-over	A clear, professional Arabic voice-over for your message.	PH-PR-VO-DAYS	PH-PR-VO
Media & Video	Explainer video	A short, animated explainer that makes your offer clear.	PH-PR-VIDEO-DAYS	PH-PR-VIDEO
Business & Documents	Proposal writing	A funder-ready or client-ready proposal, written to win.	PH-PR-PROP-DAYS	PH-PR-PROP
Business & Documents	Report & presentation	A clear report or a persuasive deck, built from your material.	PH-PR-REPORT-DAYS	PH-PR-REPORT
Events & Workshops	Workshop, run for you	A workshop designed and delivered — content, facilitation, and materials.	PH-PR-WORKSHOP-DAYS	PH-PR-WORKSHOP
Events & Workshops	Event managed end to end	An event planned and run, from logistics to the day itself.	PH-PR-EVENT-DAYS	PH-PR-EVENT
For the Diaspora	Build-home bundle	A site, brand, and presence for a venture you are building at home from abroad.	PH-PR-BUILDHOME-DAYS	PH-PR-BUILDHOME
For the Diaspora	Remote team, as a service	A verified team at home delivering ongoing work for you abroad, managed by Kayan.	Ongoing	PH-PR-REMOTE

THE PROMISE BEHIND EVERY PRODUCT

1. The same verified team standard, whatever the price.

2. A fixed scope and a fixed price, agreed before anything starts — no invented figures, no moving goalposts.
3. A named delivery date you can plan around.
4. Your payment held safely and released only when you accept the work.
5. One point of contact throughout.
6. Quality checked independently before it ever reaches you.

7 What is beneath it

The site and portals are surfaces onto the same platform the operating system runs. One source of truth, many views — public and privacy-safe, or authenticated and role-aware.

THE FRONT

Layer	Choice and why
Framework	A modern React framework with server rendering (the platform's locked choice), for speed, SEO, and Arabic-first RTL from the first byte.
Rendering	Static where possible, server-rendered where it must be, so the baseline is fast on a weak connection; the rich layers hydrate progressively.
Styling & tokens	A token-driven design system: colour, type, spacing, motion and the per-line accents all defined as tokens, so Phase F can finalise the brand without touching structure.
Motion layer	A performant animation approach for the scroll narrative and micro-interactions, tied to reduced-motion preferences, and never on the critical path to content.
Three-dimensional layer	A lightweight, lazy-loaded WebGL layer for the hero objects only, capability-tiered, budgeted, and paused off-screen — with a graceful static fallback.
RTL & i18n	Arabic-first, right-to-left native, with an English twin; one content model, two directions, no mirrored afterthoughts.

THE BACK

Layer	Choice and why
Application core	The platform's locked API service, serving the public site's live data and both portals behind authentication.
Data store	The platform's relational store holds the talent registry, the delivery record, the give-back ledger, the catalogue, and the sponsor and client records — the same source the operating system runs on.
Search & the map	The map and the catalogue read from indexed, privacy-safe views of the registry — never raw records — so the public surface can never expose what it should not.
Authentication	Separate, role-aware access for talent, clients, sponsors and staff, least-privilege throughout; the portals never share what a role must not see.
Media & assets	Encrypted object storage for portfolios, deliverables and evidence, with watermarking where a deliverable requires it.
The request routing	Every door writes to the right register and triggers the right owner with a single next step — the automation spine beneath the site.

THE LIVE DATA SURFACES

Surface	What it is
The living map	A privacy-safe, indexed view of verified talent by region and specialisation — summaries only, never raw profiles.
The delivery record	A public view of completed work as proof cards, drawn from accepted engagements.
The give-back count	A live view of community hours, projects and earned standing, from the give-back ledger.
The catalogue	The ready-products register, filterable, with tokenised prices resolved from config.
The portals	Authenticated views onto the same platform data the operating system runs — one source of truth, many surfaces.

PERFORMANCE AND REACH

1. A hard performance budget: the baseline site is fast and usable on a mid-range Android over a weak connection, measured, not assumed.
2. The rich motion and three-dimensional layers are enhancements loaded after and around the content, never before it; the site is complete and functional without them.
3. A reduced-data mode serves the still-beautiful, lightweight experience to constrained connections automatically.
4. Images and media are sized, compressed, and lazy-loaded; nothing heavy sits on the path to first meaningful content.
5. Every dimensional scene ships within a strict weight budget and is paused when off-screen.

Reach is a design constraint, not a polish. *The rich motion and dimension are enhancements on a fast, functional, accessible baseline — because the mission fails if the site only works for people on good phones and good connections.*

TRUST AND SECURITY

1. No dark patterns, ever — no false scarcity, no hidden terms, no manipulation. Trust is the product and cannot be faked.
2. Payment protection stated in plain words and honoured; the public surface never exposes internal mechanics or terms.
3. Personal and sensitive data protected by least-privilege access and encryption; identity that could endanger a person is never collected or shown.
4. Every public data surface reads from privacy-safe views; raw records never reach the browser.
5. Consent governs everything named or shown — no person, quote, or face appears without it.

FOUND AND SHARED

1. Arabic-first discoverability: the site is built to be found in Arabic, with correct language and region signals from the first byte.

2. Server rendering and clean structure so the map, the record, and the catalogue are indexable and shareable.
3. The verified talent map and the delivery record are genuine, unique content — the strongest, most ownable material a search engine could find on Yemeni talent.
4. Shareable to the channels that matter in Yemen, WhatsApp first, with correct previews.

The journeys, end to end

Journey	The path	For
A young person becomes verified talent	Arrives at the map → sees people like them → starts the journey from the site or a WhatsApp link → is oriented while they apply → completes verification → appears on the map with their own space.	AUD-TAL
A client gets work delivered	Arrives at Proof or a Ready Product → describes a need or chooses a product → sees their scope and two or three team options → chooses → watches delivery with payment held safely → accepts and releases.	AUD-CLI
A diaspora founder builds home	Arrives via the diaspora row → commissions a verified team or funds a cohort → works with the team over distance → sees the result, and the impact, reported.	AUD-DIA
A sponsor funds and sees the outcome	Enters through Sponsor or K4Y → chooses a cohort or community project → funds it inside the client environment → receives a reported line from money to outcome.	AUD-SPO
A volunteer gives and earns standing	Enters through K4Y or their space → picks a community project → gives verified hours → earns a card tier and points → is recognised.	AUD-VOL

The kit

The components the whole experience is assembled from, and the motions that bring them to life.

COMPONENTS

Component	What it is	Where
The mark	The K, as a flat asset and as the dimensional hero object that assembles.	All
Proof card	A single delivered project, rendered as evidence — the atom of the delivery record.	Home, Proof, product pages
Map surface	The dimensional talent map with lighting pins and region views.	Home, Map
Line tile	A line's dimensional tile with its accent, hero object and motion character.	Home, line pages
The count	A live, rising figure for the record and the give-back ledger, in the exact mono voice.	Home, Proof, K4Y
Door	A single, unmistakable primary action block, one per audience.	Home, throughout
Product card	A ready product: what you get, timeline, price, protection line, one action.	Products

Component	What it is	Where
Intake	The intelligent capture — write, voice, or guided — that draws out a scope.	Start a brief, client portal
Configuration chooser	The two-or-three team options presented side by side with their trade.	Client portal
Standing block	A talent's tier, card, and next step — the heart of Your Space.	Freelancer portal
Give-back tile	A community project open to volunteers, and the standing it earns.	K4Y, freelancer portal
Founders' line	The people who built Kayan, named, live.	Home, About

MOTION INVENTORY

Motion	What happens	Where
Mark assembly	The K comes into being from its parts, resolving to the sonic signature (offered).	Arrival
Scroll narrative	The thesis advances screen by screen as the page is scrolled.	Home
Pins lighting	Map pins warm into light on load and as verifications complete.	Map, Home
Hero-object reveal	Each line's dimensional object performs its signature on approach.	Line tiles, line pages
Count rising	Figures count up into view when reached.	Record, give-back
Card settle	Cards ease into their grid with depth, never snapping.	Products, Proof
The room waking	The Hub scene lights and fills.	Hub
Raw to forged	The Forge object resolves from rough to crafted.	Forge
The country lighting	Regions warm into light as the give-back count rises.	K4Y, Home
Micro-rewards	Fields, buttons and steps respond with small, calm confirmations.	Throughout, especially intake and registration

How it is built

Eight phases, each ending at a working capability, sequenced so the fast, trustworthy baseline exists before the signature layers are added on top.

Phase	Name	Scope	Done when
W-P0	Foundations	The token-driven design system, the RTL Arabic-first shell, the performance baseline, and the component kit skeleton.	Structure and tokens exist; the shell is fast and RTL-native.
W-P1	The public core	Home, How Kayan Works, the three line pages, About & Trust — content-complete, fast, accessible; motion baseline, no heavy 3D yet.	A visitor understands and trusts Kayan on any device.
W-P2	The proof surfaces	The living map, the delivery record, the give-back count — wired to the platform's privacy-safe views.	The invisible is made visible; proof is live.
W-P3	The doors & routing	Join, Start a brief, Sponsor — the intake and the request routing to registers and owners.	Every audience can act, and every action reaches the right owner.
W-P4	The portals	Your Space and Your Delivery, with the sponsor experience — authenticated, role-aware.	The relationship has a home; talent and clients live in the system.
W-P5	Ready products	The catalogue, filterable, priced from config, feeding the intake.	A client can choose, fund, and start.
W-P6	The dimensional layer	The hero objects, the sonic layer, the full motion narrative — capability-tiered, budgeted, with fallbacks.	The signature experience, without costing reach.
W-P7	Polish & Phase-F brand	The finalised visual brand applied through tokens; performance, accessibility and SEO hardened.	Elite, complete, and finalised.

What this adds to the decision session

Fork	The decision	Why it matters
F-15	The finalised visual brand — exact palette [[PH-COL-*]] and type [[PH-FONT-*]].	Phase F; applied through tokens without touching structure.
F-16	Ready-product scope and price for each product [[PH-PR-*]].	Sets the catalogue; the site prices itself from config once resolved.
F-17	The sonic signature master and its moments.	The audio identity the site introduces.
F-18	CMS choice and the content-editing model for non-technical updates.	How the team keeps the site current after launch.
