

A COMPANY WITH A CAUSE · ADEN, REPUBLIC OF YEMEN

Two chains break in this market. One mechanism closes both.

The first broken chain — client to provider. A client who needs work delivered cannot verify the provider, cannot enforce delivery, and cannot recover funds if the work fails. The relationship begins as a gamble, and every gamble taxes the price of professional work in Yemen.

The second broken chain — funder to outcome. A development partner funds training cohort after training cohort but cannot trace the graduate's path into actual paid work. Enrolment ratios are reportable; absorption ratios are not. The chain breaks between graduation and engagement — and nothing institutional closes it.

"We earn precisely because we protect people — and only a profitable institution can keep its promises for decades. Mission and margin, together."

Kayan is a wholly Yemeni-owned company, headquartered in Aden, operating Yemen's verified talent map: professionals screened across five axes — identity, skill, track record, conduct, and sanctions compliance — assembled into accountable delivery teams, with every engagement's funds bank-guaranteed until acceptance. Social impact is not a programme attached to the institution; it is how the institution operates.

WHAT YOUR DUE DILIGENCE WILL FIND

Five assurances. Four numbers we publish.

ASSURANCE	MECHANISM — VERIFIABLE, NOT VERBAL
Verified people	Five-axis screening including sanctions (OpenSanctions · OFAC · EU · UK) at intake and renewal; a public trust ladder that judges work, not circumstance.
Written scope	Deliverables, acceptance criteria, price, dates — signed before anything begins; your success criteria are the acceptance test.
Protected funds	Full value held in a dedicated bank guarantee account — we cannot touch it until you accept. No cash rails, no informal channels; corporate banking only.
Independent quality	Three reviews, the third independent of the delivery team and paid from our fee; five working days to review; misses against the written scope fixed at our cost.
Auditable file	Contract, funding record with dated FX, checkpoints, quality scores, acceptance certificate, payout records — donor-report ready, engagement by engagement.

Impact you can count — not adjectives

≥ 40% women among verified professionals

Held as a design target and published quarterly as an actual. Women-led delivery teams, a dedicated women's day and a safe daily space at the Hub, and verification that judges work rather than circumstance — participation structural, not symbolic.

Absorption, published — not attendance

Every professional we verify has a traceable path: trained → credentialed → placed into paid work, with dates. We report who got paid work, because that is the number that changes a life and a market.

100% bank-guaranteed engagements

Fair, documented rates released from secured funds — employment outcomes your programme can evidence, with payment records available under our data-protection rules.

Volunteering on the record

Community service through Kayan for Yemen — the cause inside the company — is recorded on each professional's card: engage youth → train & credential → volunteer → absorb into paid work. The journey is the model.

8 SDG 8 at the core — decent work through verified, fairly-paid engagements — supported by **4** skills-to-credential training · **5** structural women's participation · **9** trust infrastructure & a solar-powered facility · **10** work judged on merit — diaspora, displaced, and disabled professionals on equal footing · **17** one accountable local partner.

ENGAGEMENT, IN FIVE STEPS

From brief to audited file

STEP	WHAT HAPPENS
1 · Brief	A structured intake — need, success criteria, timeline. Same-day response, always.
2 · Scope & sign	Written scope with acceptance criteria and a fixed price; institutional terms accommodated (POs, milestone certification, frame agreements).
3 · Fund & start	Funds to the guarantee account; a named contact and a checkpoint calendar you approve.
4 · Deliver & accept	Independent review → submission with the scope checked line by line → your five-day review → acceptance certificate for your file.
5 · Evidence	Thirty-day funded warranty · the complete engagement file handed over · impact lines (people engaged, rates paid, women's share) reported in your format.

The right door for your mandate

IF YOU ARE...	THE CONVERSATION WE PROPOSE
A UN agency / INGO programme	A pilot scope in translation, research support, reporting, or design — 15% flat institutional fee, compliance pack in your inbox today.
A bilateral or institutional donor	A frame agreement making verified local delivery procurable at programme scale — absorption reporting built in.
A foundation	Sponsor a named training cohort and follow it — publicly — from credential to paid work. A model that outlives the grant.

"We do not ask partners to trust a promise. We show them proof — the same discipline that protects a client's payment protects a funder's outcome."
