MANAGED DELIVERY

Ready Products Catalogue

كتالوج المنتجات الجاهزة

WHAT THIS IS

Kayan's full range of services as fixed-scope, fixed-price products — choose, fund, and start.

A Yemeni operating institution ◆ Aden
Kayan Innovation, Entrepreneurship & Work Environments LLC

OWNER: CEO (MAHER FAISAL SAEED FAREA) · SALES ◆ SHAREABLE — CLIENT-
FACING

Effective 30 June 2026

HOW IT OPERATES

WHAT THIS IS	Kayan's complete productised range — 35 ready-made offers across eight families, each a fixed scope at a fixed price, delivered by a managed pod under escrow.
WHO IT IS FOR	Every client Kayan serves — from an individual or a new founder, to a restaurant, a hotel, an SME, an NGO, a government body, or a businessman.
APPROVAL & ENDORSEMENT	Owned by the CEO and Sales; each order is confirmed and the price is held in escrow before any work begins.
WHEN IT IS USED	At the first client conversation, on the platform, and in every sales pitch — the fastest route from interest to a funded project.
WORKFLOW	Choose a product → fund 100% into escrow → the pod delivers and is QA-checked → 5-day review → acceptance releases payment.
COST / FEE	Prices are in USD and include the 20% Kayan net fee; converted to YER at the actual Aden rate on the day of payment.
OWNER & REVIEW	CEO / Sales. Reviewed quarterly; new products graduate from the Ideas Bank as demand and the verified bench allow.

01 IDEA

Choose. Fund. Start.

In a market where the hardest part of buying a service is trusting it will arrive, Kayan sells the trust pre-packaged.

In Aden today, commissioning professional work is an act of faith. Scope is argued over, prices are invented on the spot, deadlines slip, and there is rarely any recourse if the work never comes. The Ready Products Catalogue removes that friction entirely. Each product has a fixed scope, a fixed price, a named delivery date, and a managed team behind it — and every order is protected by escrow from the first day. The client does not negotiate a brief; they choose a product the way they would choose anything else they trust. This catalogue spans thirty-five products, from a USD 280 voice-over to a USD 5,500 custom platform, so that whoever walks through the door — an individual, a founder, a café, a hotel, an NGO, or a businessman — finds something built precisely for them.

No scope to negotiate. No invoice to chase. The founding rule holds: no funded escrow, no work.

FIGURE ♦ *Five steps from a decision to a delivered result — the same trust gate behind every product.*

0 2 PROMISE

What Every Product Guarantees

A Ready Product is never just a price. Behind each one stands the full Kayan machinery — the same gates, the same verified pods, the same escrow that protects a six-figure managed-delivery contract. Six things are true of every product in this catalogue.

FIGURE ♦ *Whatever the client buys, this is what sits behind the price.*

0 3 FAMILIES

Eight Families, One Institution

The catalogue is organised into eight families so a client can find their need at a glance. Brand & Creative and the recurring lines run under Kayan Studio; the build and project lines under Kayan Managed Delivery; research and evaluation under a dedicated data practice; and the

enterprise suites bring several products together for hotels, serious restaurants, and business leaders. All families run on the same pods, gates, escrow, and the Kayan Card.

FIGURE ♦ *Eight families, thirty-five products — colour-coded throughout this catalogue.*

04 RANGE

The Full Range

Products span USD 280 to USD 5,500 — deliberately, so a cautious first client can start small, see the gates and the guarantee work once, and climb. The first completed product is rarely about its fee; it is the verified delivery record that earns the next, larger commission.

The full range — 35 products from USD 280 to USD 5,500

FIGURE ♦ *Every dot is one product — the full price range at a glance.*

05 THE CATALOGUE

The Catalogue

Thirty-five products across eight families — each a complete promise: the team, the time, the deliverables, and what each dollar buys.

- ◀ Headshot direction
- ◀ 10 thought-leadership post drafts
- ◀ Personal 1-page website

EACH DOLLAR BUYS: *A leader who looks the part online — to partners, press, and investors*

06

MONEY

Where the Money Goes

Because the products are productised, the economics are transparent — and the same on every order. The client funds the full price into escrow at the Tadamon Islamic Bank before work begins. That money is never Kayan's revenue; it is the talent's, held safe until the work is accepted. On acceptance, the talent is paid 80%, Kayan recognises only its 20% net fee, and a 2% holdback is kept for 30 days against any defect, then released.

A \$1,200 website — where the money goes

Client funds \$1,200 into escrow up front. On acceptance, talent is paid 80% (\$960). Kayan recognises only its net fee (\$240) as revenue. A 2% holdback (\$24) is kept 30 days against defects, then released. The client's money was never Kayan's revenue — it was always the talent's, held safe until the work was accepted.

FIGURE ♦ *A worked example — the USD 1,200 website, and exactly where each dollar goes.*

07

RULES

The Rules of the Catalogue

- ♦ **Choose a tier where one exists.** Several products (Website, Brand Identity, Social Media, Startup-in-a-Box, Market Study) come in Good / Better / Best tiers so a client can match the scope to the budget.
- ♦ **One free revision is included** unless the product states more. Further revisions are 20% of the product price.
- ♦ **Acceptance is a 5-business-day window.** Acceptance releases payment; silence within the window is deemed acceptance.
- ♦ **Prices are in USD and held firm;** payment in YER converts at the actual Aden rate on the day, recorded against the dated rate table — never a notional rate.
- ♦ **Retainers are billed monthly in advance;** rush delivery is +10% (it accelerates the pod, never skips a gate); and the founding rule is absolute — no signed order and no funded escrow means no work.

A product is the beginning of a relationship, not the end of a transaction: a Brand Identity leads to a Website and a Bookkeeping retainer; a Market Study leads to a Pitch Pack, an MVP, and a

raise; a Restaurant Launch Kit grows into the Enterprise Suite. The catalogue is the front door; the managed-delivery engine is the house.
