IMPACT & PARTNERSHIPS

Impact & SDG Framework

إطار الأثر وأهداف التنمية المستدامة

WHAT THIS IS

How Kayan measures its impact and advances the Global Goals — auditable, published, honest.

A Yemeni operating institution ♦ Aden
Kayan Innovation, Entrepreneurship & Work Environments LLC

OWNER: CEO (MAHER FAISAL SAEED FAREA) ♦ SHAREABLE — DONOR & PARTNER

Effective 30 June 2026

HOW IT OPERATES

WHAT THIS IS	Kayan's framework for measuring social impact and the Sustainable Development Goals it advances.
WHO IT IS FOR	Donors, partners, and the founding team; the basis of impact reporting.
APPROVAL & ENDORSEMENT	Owned by the CEO; indicators baselined at launch and reported annually.
WHEN IT IS USED	In proposals, due diligence, and the annual impact report.
WORKFLOW	Define indicators → baseline at launch → collect via platform & Card → report and publish annually.
COST / FEE	None — it is what lets Kayan pass donor due diligence and win partnership.
OWNER & REVIEW	CEO. Reviewed annually.

01 PRINCIPLE

Mission and Margin Together

Kayan profits by doing what is right — and measures whether it actually did.

Kayan rejects the false choice between commercial success and social good. The escrow model, the verification system, and the managed-delivery engine generate revenue precisely because they protect people — paying talent fairly and on time, and guaranteeing clients a result. Impact here is therefore not a marketing layer; it is measured, baselined, and published, so it can be audited like any other part of the business.

02 GOALS

The Global Goals We Advance

Managed Delivery & Hub → 8, 9 · Academy & Forge → 4, 8, 5 · trust model → 16 · donor partnerships → 17 · access → 10

FIGURE ♦ *Kayan directly advances seven Sustainable Development Goals.*

Kayan advances decent work and economic growth (SDG 8) and innovation and infrastructure (SDG 9) through Managed Delivery and the Hub; quality education and skills (SDG 4) and women's economic inclusion (SDG 5) through Kayan Forge; reduced inequality (SDG 10) by connecting constrained talent to global demand; strong institutions (SDG 16) through its verified, governed trust model; and partnerships (SDG 17) through its donor and development collaborations.

03 MEASURE

What We Measure

Illustrative Year-1 targets — baselined at launch, then published

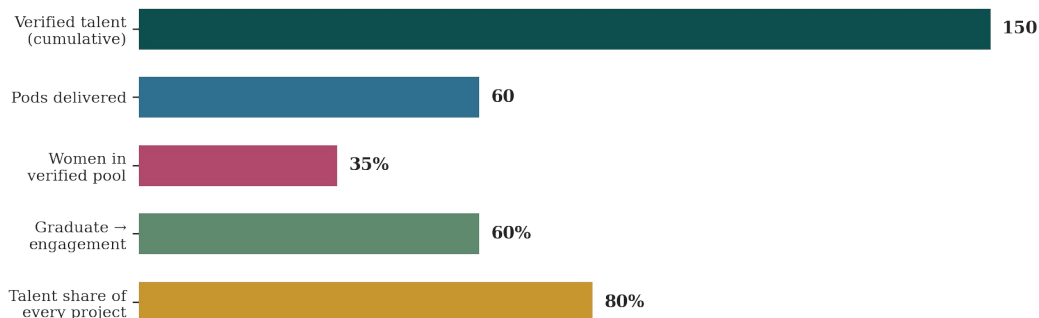

FIGURE ♦ *The indicators Kayan baselines and publishes.*

Indicator	Year-1 target	Source
Verified talent (cumulative)	150	Freelancer Registry
Pods delivered	60	Project Tracker

Indicator	Year-1 target	Source
Women in the verified pool	35%	Freelancer Registry
Graduate → engagement conversion	60%	Kayan Forge + Registry
Talent share of every project	80%	Financial Policy
On-time delivery	over 90%	Managed Delivery Standard

Targets are illustrative until baselined at launch; they are then tracked through the platform, the Project Tracker, and the Kayan Card, and reported annually. All personal data behind these indicators is handled under the Data Protection Policy.

04 FRAME

The Donor Frame

For a development partner, the value is specific: every training dollar that never reaches an absorption layer is a partial outcome. Kayan is the auditable absorption layer that completes the chain — converting funded training into engaged, income-earning Yemeni practitioners, and showing the conversion in published numbers.
