

KAYAN

The Portal Copy Book

Every word the applicant reads, screen by screen — labels, helper text, buttons and messages — written once, in final form, for the brand and platform teams to place exactly as written.

Document	Companion to	Screens	Fields	Language
KAY-TOS-001 / CB	The Talent Operating System	18	126	English master

▪ How to read this book

This is not a specification of the database and it is not a description of the screens. It is the copy itself — the exact language a person meets as they move through registration — set down so that it can be implemented without a second draft and without anyone inventing wording under deadline.

Each screen is a section. Under it, every field appears as a block. The gold block is the copy that ships: the on-screen helper line the applicant reads. The label is what sits above the input. The grey line beneath each block is an implementation note — input type, options, and the rule that governs the field — and the short dark line is the reason the field exists, kept here so no one later removes a field without understanding what it protects.

THE VOICE

Plain, adult, and calm. It explains before it asks. It never wheedles and never shouts. It assumes the reader is capable and busy. Where a value is not yet decided it appears as a `PH-TOKEN` ; the token is replaced once, centrally, never guessed at the point of use. British-English master spelling; no exclamation marks in system copy.

S00 Gateway

This is the eight-second gate. No fields, no login — one screen whose only job is to make a stranger understand the offer and stop being afraid of a long form.

Visibility	Public
Entry condition	None. Read only.
Design intent	The first eight seconds. Explain the offer and remove the fear of a long form.
Owned by	POS-BRD-LEAD

No input fields — display and action only.

S01 Create account

The person commits to an identity. We ask for as little as will let us reach them again. Every extra box here costs completions.

Visibility	Public
Entry condition	account
Design intent	Establish an account before any personal data is requested.
Owned by	POS-TECH-LEAD

ACC-01 · SHORT TEXT · REQUIRED

Full name as you want to be known

ON SCREEN

This is how we will greet you. Your legal name is collected separately at verification.

OPTIONS: Free text, 2 to 80 characters · **RULE:** Two words minimum. Letters, spaces, hyphens and apostrophes only. No digits. · **WRITES TO:** account.display_name

Why we ask — It is the name we will use when we speak to you. The legal name comes later and can differ.

ACC-02 · PHONE · REQUIRED

Mobile number

ON SCREEN

Use the number that has your messaging app on it. We will send a code to it in the next step.

OPTIONS: Country selector plus national number · **RULE:** Valid for the selected country. Stored in international format. Must be unique in the registry. · **WRITES TO:** account.msisdn

Why we ask — One person, one account. The number is the account key and the channel we will actually use.

ACC-03 · EMAIL · REQUIRED

Email address

ON SCREEN

We send contracts and payment advices here. Use an address you will still have in two years.

OPTIONS: Free text · **RULE:** Standard address validation. Must be unique. Disposable-domain list rejected with a plain explanation. · **WRITES TO:** account.email

Why we ask — Formal records, contracts and payment advices go to email. Messaging is for speed, email is for record.

ACC-04 · SINGLE SELECT · REQUIRED

Preferred contact channel

ON SCREEN

Pick the one you check most. You can change it at any time in your space.

OPTIONS: Messaging app, Email, Voice call · **RULE:** One value required. · **WRITES TO:** account.preferred_channel

Why we ask — We route notifications on the channel the applicant actually reads.

ACC-05 · SINGLE SELECT · REQUIRED

How you heard about Kayan

ON SCREEN

This helps us know which of our efforts reach real people.

OPTIONS: Someone told me, Social media, Kayan Hub, A Forge cohort, An employer or client, A community organisation, Search, Other · **RULE:** One value. Free text field appears when Other is chosen. · **WRITES TO:** account.source

Why we ask — Attribution for the acquisition model, and it tells us which channels actually carry trust.

ACC-06 · SHORT TEXT · OPTIONAL

Referral code

ON SCREEN

If a Kayan talent, volunteer or partner sent you, put their code here so they get the credit.

OPTIONS: Free text, optional · **RULE:** If present, must resolve to an active talent, volunteer or partner code. · **WRITES TO:** account.referrer_code

Why we ask — Referral is the strongest quality signal we have. It also credits the referrer.

ACC-07 · PASSWORD · REQUIRED

Password

ON SCREEN

Length beats symbols. A short phrase you will remember is stronger than a scrambled word.

OPTIONS: Masked with strength meter and reveal toggle · **RULE:** Minimum 10 characters. Checked against a breached-password list. No composition rules beyond length. · **WRITES TO:** account.password_hash

Why we ask — Account security without the theatre of forced symbols that push people to reuse passwords.

ACC-08 · SINGLE SELECT · REQUIRED

Interface language

ON SCREEN

You can switch at any time. Nothing you have entered is lost when you switch.

OPTIONS: Arabic, English · **RULE:** Defaults to the browser language. Changeable at any time. · **WRITES TO:** account.locale

Why we ask — The whole portal must be usable in the applicant's working language.

S02 Confirm channel

We prove the channel is real before anything else is invested in it, because every later message depends on it.

Visibility	Public
Entry condition	account_channel
Design intent	Prove the person controls the contact channel they gave.
Owned by	POS-TECH-LEAD

CHN-01 · NUMERIC CODE · REQUIRED

Verification code

ON SCREEN

We sent a six digit code. It expires shortly. Tap resend if it does not arrive.

OPTIONS: Six digits, one field per digit, paste supported · **RULE:** Expires in `PH-OTP-TTL` . Maximum `PH-OTP-TRIES` attempts, then a cool-down. · **WRITES TO:** account_channel.verified_at

Why we ask — Proves the applicant controls the number. Blocks the most common form of duplicate registration.

CHN-02 · ACTION · OPTIONAL

Resend on a different channel

ON SCREEN

If the message does not arrive we can call you and read the code aloud.

OPTIONS: Send by messaging app, Send by SMS, Call me with the code · **RULE:** Rate limited. Voice fallback available after two failed sends. · **WRITES TO:** account_channel.delivery_attempts

Why we ask — Network conditions in Yemen are not uniform. A single delivery route excludes people.

S03 Orientation

The orientation. Before we ask a person to work, we tell them plainly what Kayan is and is not, and we do not let them past until they have actually read it.

Visibility	Gated
Entry condition	orientation_ack
Design intent	Teach the model before asking for anything. Six cards, each acknowledged.
Owned by	POS-BRD-LEAD

ORI-01 · ACKNOWLEDGEMENT CARD · REQUIRED

What Kayan is

ON SCREEN

Kayan is not a job board and not a marketplace. We take the work, we stand behind it, and we build the team that delivers it.

OPTIONS: Read and continue · RULE: Continue disabled until the card has been on screen for PH-ORI-DWELL . · WRITES TO: orientation_ack.card_01

Why we ask — People who understand the model complete verification. People who do not, abandon it.

ORI-02 · ACKNOWLEDGEMENT CARD · REQUIRED

How you get work

ON SCREEN

You do not bid against other people. When a project matches what you can do, we invite you to a pod.

OPTIONS: Read and continue · RULE: As above. · WRITES TO: orientation_ack.card_02

Why we ask — Sets the expectation that work arrives through pods, not through bidding.

ORI-03 · ACKNOWLEDGEMENT CARD · REQUIRED

How you get paid

ON SCREEN

The client pays before the work starts. The money is held, not spent. You are paid against accepted milestones, into your own bank account.

OPTIONS: Read and continue · RULE: As above. · WRITES TO: orientation_ack.card_03

Why we ask — Payment anxiety is the single largest reason freelancers disengage. Address it before the form, not after.

ORI-04 · ACKNOWLEDGEMENT CARD · REQUIRED

What verification is

ON SCREEN

Verification is not a test of whether you are good enough. It is how we earn the right to promise a client that you are real, able and reliable.

OPTIONS: Read and continue · **RULE:** As above. · **WRITES TO:** orientation_ack.card_04

Why we ask — Frames verification as a permission system rather than a judgement of worth.

ORI-05 · ACKNOWLEDGEMENT CARD · REQUIRED

What we expect

ON SCREEN

Answer when we contact you. Tell us early if something slips. Never send work that is not yours. That is most of it.

OPTIONS: Read and continue · **RULE:** As above. · **WRITES TO:** orientation_ack.card_05

Why we ask — States the obligations before consent, so consent means something.

ORI-06 · ACKNOWLEDGEMENT CARD · REQUIRED

What this will take

ON SCREEN

*About **PH-FORM-MINUTES** minutes now, plus a practical task and a short conversation. You can stop and return at any point.*

OPTIONS: Read and continue · **RULE:** As above. · **WRITES TO:** orientation_ack.card_06

Why we ask — Honest time estimate reduces abandonment more than any progress bar.

ORI-07 · MULTIPLE CHOICE, THREE ITEMS · REQUIRED

Comprehension check

ON SCREEN

Three quick questions. There is no penalty for a wrong answer, we will just show you that part again.

OPTIONS: Three single-select questions drawn from the six cards · **RULE:** All three must be answered. Wrong answers reveal the correct card again rather than blocking. · **WRITES TO:** orientation_ack.check_score

Why we ask — Confirms the model landed. Also gives us a measurable orientation completion signal.

S04 About you

Who the person is, in their own words. This is the human layer — name, city, language — nothing that could put them at risk if it leaked.

Visibility	Gated
Entry condition	talent_profile
Design intent	Collect the identity core that everything else attaches to.
Owned by	POS-TAL-LEAD

PRF-01 · SHORT TEXT · REQUIRED

Full legal name

ON SCREEN

Exactly as it appears on your identity document, even if you never use that form of your name.

OPTIONS: Free text, as written on the identity document · **RULE:** Must match the identity document at verification within an accepted variance for transliteration. · **WRITES TO:** talent_profile.legal_name

Why we ask — Contracts and payment instructions carry the legal name. A mismatch stops a payment.

PRF-02 · DATE · REQUIRED

Date of birth

ON SCREEN

We register adults only. If you are under age there is a separate Forge route open to you.

OPTIONS: Date picker, calendar-aware · **RULE:** Must be `PH-MIN-AGE` or above. Future dates rejected. · **WRITES TO:** talent_profile.dob

Why we ask — Age eligibility and safeguarding.

PRF-03 · SINGLE SELECT · OPTIONAL

Gender

ON SCREEN

We report participation in aggregate to our partners. It plays no part in whether you get work.

OPTIONS: Woman, Man, Prefer not to say · **RULE:** Optional. Never used in matching. · **WRITES TO:** talent_profile.gender

Why we ask — Only for inclusion reporting in aggregate. It is never a matching input and never shown to clients.

PRF-04 · SINGLE SELECT · REQUIRED

Nationality

OPTIONS: Country list · RULE: One value. · WRITES TO: talent_profile.nationality

Why we ask — Sanctions screening and payment routing depend on it.

PRF-05 · SINGLE SELECT · REQUIRED

Country of residence

ON SCREEN

Where you actually live now, which may not be where you are from.

OPTIONS: Country list, Yemen first · RULE: One value. Drives the payment route options at S08. · WRITES TO: talent_profile.country

Why we ask — Determines payment route, timezone handling and whether Hub benefits apply.

PRF-06 · SINGLE SELECT · REQUIRED

Governorate or region

OPTIONS: Governorate list when Yemen is selected, otherwise free text · RULE: Conditional on country. · WRITES TO: talent_profile.region

Why we ask — Enables the Aden-presence rule on pods and local convening.

PRF-07 · SHORT TEXT · REQUIRED

City

OPTIONS: Free text with suggestion list · RULE: 2 to 60 characters. · WRITES TO: talent_profile.city

PRF-08 · SINGLE SELECT · REQUIRED

Are you a Yemeni living outside Yemen

OPTIONS: Yes, No · RULE: One value. When Yes, reveals PRF-09. · WRITES TO: talent_profile.diaspora_flag

Why we ask — Opens the diaspora track: different payment routes, different products, different time zones.

PRF-09 · SINGLE SELECT · REQUIRED

Time zone

ON SCREEN

We will show you the overlap with Aden hours so you can judge what suits you.

OPTIONS: Time zone list, defaults from device · RULE: Conditional. Shown when residence is outside Yemen. · WRITES TO: talent_profile.timezone

Why we ask — Overlap hours are a hard scheduling constraint for pods.

PRF-10 · REPEATING GROUP · REQUIRED

Working languages and level

ON SCREEN

Be honest about level. We will test the languages you claim to work in.

OPTIONS: Language plus level: Native, Professional, Working, Basic · **RULE:** At least one at Professional or above. ·

WRITES TO: talent_profile_language

Why we ask — Language is a matching field and a quality risk if overstated.

PRF-11 · SINGLE SELECT · REQUIRED

Highest completed education

ON SCREEN

We record it. We do not weight it. The practical task decides.

OPTIONS: No formal qualification, Secondary, Diploma, Bachelor, Master, Doctorate · **RULE:** One value. · **WRITES TO:** talent_profile.education_level

Why we ask — Context, not a filter. Self-taught practitioners pass at the same rate.

PRF-12 · SHORT TEXT · OPTIONAL

Field of study

ON SCREEN

Leave blank if it is not relevant to the work you do.

OPTIONS: Free text, optional · **RULE:** 0 to 80 characters. · **WRITES TO:** talent_profile.education_field

PRF-13 · SINGLE SELECT · REQUIRED

Current situation

OPTIONS: Working full time, Working part time, Freelancing, Studying, Not currently working, Other · **RULE:** One value. ·

WRITES TO: talent_profile.employment_status

Why we ask — Capacity realism and programme targeting.

PRF-14 · FILE UPLOAD · REQUIRED

Profile photograph

ON SCREEN

Face the camera, plain background, good light, no filter, no sunglasses. Tap the guide if you want the full standard.

OPTIONS: Single image · **RULE:** JPEG or PNG. 600 by 600 pixels minimum. Maximum **PH-PHOTO-MB** MB. Face detected, single face, eyes open, unobstructed. · **WRITES TO:** talent_profile.photo_ref

Why we ask — It appears on the card and on the public verification page. A verifier compares it to the person in front of them.

PRF-15 · DOWNLOAD LINK · OPTIONAL

Photograph guide

ON SCREEN

We will tell you before you submit if the photo will not pass, so you never wait days to find out.

OPTIONS: Downloadable one page guide plus in-browser camera with live framing overlay · **RULE:** Guide available in both languages. · **WRITES TO:** static.photo_guide

Why we ask — Removes the most common cause of rework in the whole funnel.

PRF-16 · LONG TEXT · REQUIRED

Short professional summary

ON SCREEN

Write it as you would say it. What you do, who you have done it for, what you are good at.

OPTIONS: Free text, 200 to 600 characters, live counter · **RULE:** Minimum 200 characters. Machine-generated text detector runs as a soft flag, never an automatic rejection. · **WRITES TO:** talent_profile.summary

Why we ask — It is the first thing a delivery lead reads when assembling a pod.

S05 What you do

The identity document. Handled with more care than anything else in the form, and explained as we go so it never feels like surveillance.

Visibility	Gated
Entry condition	talent_specialisation
Design intent	Map declared capability onto the taxonomy so matching can work.
Owned by	POS-TAL-LEAD

SPC-01 · SINGLE SELECT · REQUIRED

Primary domain

ON SCREEN

Choose where most of your work sits. You can add others below.

OPTIONS: Domain list from the taxonomy, with a one line description each · **RULE:** One value. · **WRITES TO:** talent_specialisation.primary_domain

Why we ask — The top of the matching tree.

SPC-02 · SINGLE SELECT · REQUIRED

Primary specialisation

ON SCREEN

This is the one we will assess you on first.

OPTIONS: Specialisations filtered by the chosen domain · **RULE:** One value. Determines which assessment you will sit. · **WRITES TO:** talent_specialisation.primary_spec

Why we ask — This decides the practical task at S11, so it must be precise.

SPC-03 · MULTI SELECT · OPTIONAL

Additional specialisations

ON SCREEN

Only pick what you would be comfortable being tested on.

OPTIONS: Up to three further specialisations from any domain · **RULE:** Maximum three. Each may be assessed later. · **WRITES TO:** talent_specialisation.secondary_specs

Why we ask — Cross-domain talent is what makes small pods work.

SPC-04 · MATRIX · REQUIRED

Self-assessed level per specialisation

ON SCREEN

There is no advantage in overstating. We compare what you say to what you show.

OPTIONS: Per specialisation: Learning, Working, Proficient, Expert with a written definition of each · **RULE:** One value per selected specialisation. · **WRITES TO:** talent_specialisation.self_level

Why we ask — We compare the declaration to the assessed result. A large gap is itself a signal.

SPC-05 · MULTI SELECT WITH SEARCH · REQUIRED

Tools and technologies

ON SCREEN

Add anything missing and we will consider it for the library.

OPTIONS: Tool library filtered by specialisation, free entry permitted · **RULE:** At least three. · **WRITES TO:** talent_specialisation.tools

Why we ask — Practical matching. Clients ask for tools, not for abstractions.

SPC-06 · SINGLE SELECT · REQUIRED

Years working in the primary specialisation

OPTIONS: Under 1, 1 to 2, 3 to 5, 6 to 10, Over 10 · **RULE:** One value. · **WRITES TO:** talent_specialisation.years

Why we ask — Rate band context and pod role fit.

SPC-07 · MULTI SELECT · OPTIONAL

Sectors you have worked in

ON SCREEN

Institutional clients value someone who already knows their world.

OPTIONS: Humanitarian and development, Government, Education, Health, Commerce and retail, Financial services, Technology, Media, Agriculture and fisheries, Energy, Construction, Other · **RULE:** Up to five. · **WRITES TO:** talent_specialisation.sectors

Why we ask — Sector familiarity materially changes the quality of institutional work.

SPC-08 · SINGLE SELECT · REQUIRED

Would you like to be considered as a pod lead in future

ON SCREEN

This is about the future. It has no effect on your verification now.

OPTIONS: Yes, Not yet, No · RULE: One value. Does not affect the current tier. · WRITES TO:
talent_specialisation.lead_intent

Why we ask — Leadership intent is scarce and worth capturing early.

S06 Your work

The face check, made painless. We tell the person exactly what a good photo looks like before they take it, so it passes the first time.

Visibility	Gated
Entry condition	talent_artefact
Design intent	Gather evidence, not claims.
Owned by	POS-TAL-ASM

WRK-01 · URL · OPTIONAL

Portfolio link

ON SCREEN

If your work lives on a site, a repository or a drive folder, link it here.

OPTIONS: Free text URL · **RULE:** Valid URL. Reachability checked and the result shown immediately. · **WRITES TO:** talent_artefact.portfolio_url

Why we ask — Fastest route to an assessment for people who already publish their work.

WRK-02 · URL · OPTIONAL

Professional network profile

OPTIONS: Free text URL · **RULE:** Valid URL. · **WRITES TO:** talent_artefact.network_url

Why we ask — Reference discovery and employment corroboration.

WRK-03 · REPEATING FILE UPLOAD · REQUIRED

Work samples

ON SCREEN

Three pieces minimum. Choose your best, not your newest.

OPTIONS: Minimum three, maximum ten items · **RULE:** Each item: PDF, image, document, archive or link. Maximum **PH-ARTEFACT-MB** MB each. · **WRITES TO:** talent_artefact

Why we ask — This is the evidence the rubric is applied to. Three is the floor because one is luck and two is a pair.

WRK-04 · SHORT TEXT · REQUIRED

For each sample: what it is

ON SCREEN

One line. What was it and who was it for.

OPTIONS: Free text, 10 to 120 characters · RULE: Per artefact. · WRITES TO: talent_artefact.title

WRK-05 · SINGLE SELECT · REQUIRED

For each sample: your role

ON SCREEN

Be exact. We would rather see honest team work than an overstated solo claim.

OPTIONS: Sole author, Lead with a team, Contributor within a team, Student or practice work · RULE: Per artefact. · WRITES TO: talent_artefact.role

Why we ask — Provenance. A team piece claimed as solo work is the most common integrity failure we see.

WRK-06 · MONTH AND YEAR · REQUIRED

For each sample: when

OPTIONS: Date picker · RULE: Per artefact. Not in the future. · WRITES TO: talent_artefact.completed_on

Why we ask — Recency weighting in the rubric.

WRK-07 · SINGLE SELECT · REQUIRED

For each sample: may we show it

ON SCREEN

If the client has not agreed, choose internal only. That is the safe answer and it costs you nothing.

OPTIONS: Yes publicly, Yes to clients only, No, internal assessment only · RULE: Per artefact. Defaults to internal only. · WRITES TO: talent_artefact.visibility

Why we ask — Client confidentiality survives the applicant's enthusiasm. The default must be closed.

WRK-08 · REPEATING GROUP · OPTIONAL

Certifications

ON SCREEN

Add only what you can evidence if asked.

OPTIONS: Name, issuing body, year, credential link or file · RULE: Up to eight entries. · WRITES TO: talent_credential

Why we ask — Verified where cheaply verifiable, recorded where not.

Forge cohort

ON SCREEN

If you completed a Kayan Forge cohort we already hold your capstone. It counts.

OPTIONS: Cohort list, or Not applicable · **RULE:** Conditional. Auto-filled when the account matches a Forge graduate record.

· **WRITES TO:** talent_profile.forge_cohort_id

Why we ask — Graduates carry evidence we generated ourselves, which is the strongest evidence we hold.

S07 Your time

The professional self — the domains and specialisations the person claims. This is a claim, not yet a proof; the proof comes later.

Visibility	Gated
Entry condition	talent_capacity
Design intent	Establish honest capacity before any assignment is possible.
Owned by	POS-MD-CO

CAP-01 · SINGLE SELECT · REQUIRED

Hours a week you can commit

ON SCREEN

Declare what is true on a normal week, not your best week.

OPTIONS: Under 5, 5 to 10, 11 to 20, 21 to 30, Over 30 · RULE: One value. · WRITES TO: talent_capacity.weekly_hours

Why we ask — Capacity axis baseline. Over-declaration is the leading cause of missed milestones.

CAP-02 · MULTI SELECT · REQUIRED

Days you are usually available

OPTIONS: Sunday through Saturday · RULE: At least two days. · WRITES TO: talent_capacity.days

Why we ask — Pod scheduling and client response windows.

CAP-03 · RANGE SELECT · REQUIRED

Usual working window

ON SCREEN

We will show you your overlap with Aden as you set this.

OPTIONS: Start and end hour, in the applicant's own time zone · RULE: Start before end. Overlap with Aden hours computed and displayed live. · WRITES TO: talent_capacity.window

Why we ask — Overlap is what makes a distributed pod function.

CAP-04 · SINGLE SELECT · REQUIRED

How soon could you start

OPTIONS: Immediately, Within a week, Within a month, Not looking yet · RULE: One value. · WRITES TO: talent_capacity.availability_from

Why we ask — Pipeline realism.

CAP-05 · SINGLE SELECT · REQUIRED

Do you hold other commitments

ON SCREEN

This never counts against you. It helps us give you work that fits your life.

OPTIONS: No, Yes a job, Yes study, Yes other freelance work, Yes caring responsibilities · RULE: One value. Never used to exclude. · WRITES TO: talent_capacity.other_commitments

Why we ask — Honest capacity, and it lets us schedule around real life rather than pretend it does not exist.

CAP-06 · SINGLE SELECT · REQUIRED

Can you work at the Kayan Hub in Aden

ON SCREEN

The Hub has power, internet and a desk waiting. If you are in Aden it is open to you.

OPTIONS: Yes regularly, Yes occasionally, No, I am not in Aden · RULE: One value. · WRITES TO: talent_capacity.hub_access

Why we ask — Drives the Aden-presence pod rule and Hub benefit provisioning.

CAP-07 · MULTI SELECT · REQUIRED

Your working setup

ON SCREEN

Tell us the truth here. If your power is unreliable we will plan around it, not around you.

OPTIONS: Own laptop, Own desktop, Smartphone only, Shared or borrowed device, Reliable power, Intermittent power, Reliable internet, Intermittent internet · RULE: At least two. · WRITES TO: talent_capacity.setup

Why we ask — Realistic assignment. It also tells us who genuinely needs the Hub.

CAP-08 · LONG TEXT · OPTIONAL

Accessibility or accommodation needs

ON SCREEN

Tell us what would make working with us work for you. It stays between you and the talent team.

OPTIONS: Free text, optional · **RULE:** Routed to POS-TAL-LEAD, never shown to clients. · **WRITES TO:** talent_capacity.accommodations

Why we ask — We accommodate by design, not on request after the fact.

S08 Getting paid

Evidence. The person shows the work behind the claim, in whatever form their field produces.

Visibility	Gated
Entry condition	talent_payment_route
Design intent	Set the payment route in the applicant's own name.
Owned by	POS-FIN

PAY-01 · SINGLE SELECT · REQUIRED

Payment route

ON SCREEN

We pay into accounts held in your own name. That is a rule we do not bend.

OPTIONS: Options filtered by country of residence · **RULE:** One value. Options are the approved institutional routes only. ·

WRITES TO: talent_payment_route.method

Why we ask — Payment routing is a control, not a preference. Only approved routes appear.

PAY-02 · SHORT TEXT · REQUIRED

Account holder name

ON SCREEN

It must be your own account. We cannot pay a relative's or a friend's account.

OPTIONS: Free text · **RULE:** Must match the legal name at PRF-01 within accepted transliteration variance. A mismatch blocks payout, not registration. · **WRITES TO:** talent_payment_route.holder_name

Why we ask — Third-party accounts are how funds get diverted. The name must be the person's own.

PAY-03 · SINGLE SELECT · REQUIRED

Institution

OPTIONS: Approved institution list by country · **RULE:** One value. · **WRITES TO:** talent_payment_route.institution

PAY-04 · SHORT TEXT · REQUIRED

Account or IBAN

ON SCREEN

We encrypt this. Staff see only the last four digits.

OPTIONS: Masked after entry, last four visible · **RULE:** Format validated per institution. Stored encrypted. · **WRITES TO:** talent_payment_route.account_ref

PAY-05 · CHECKBOX · REQUIRED

Confirmation of account ownership

ON SCREEN

I confirm this account is in my own name and I am its holder.

OPTIONS: Single explicit statement · **RULE:** Must be ticked. Recorded with timestamp. · **WRITES TO:** consent_record.own_account

Why we ask — Creates a clear record if a diversion is ever attempted.

PAY-06 · SHORT TEXT · OPTIONAL

Tax or registration reference

OPTIONS: Free text, optional · **RULE:** Conditional on country. · **WRITES TO:** talent_payment_route.tax_ref

Why we ask — Some jurisdictions require it for a lawful payment.

PAY-07 · NOTICE · REQUIRED

Prohibited routes notice

ON SCREEN

We do not use informal transfer, cryptocurrency or anyone else's account. Not once, not as a favour.

OPTIONS: Read only · **RULE:** Acknowledged. · **WRITES TO:** consent_record.payment_rules

Why we ask — Informal transfer, cryptocurrency and third-party accounts are prohibited without exception.

S09 Prove it is you

Availability and capacity — the honest hours. We frame it as planning, not a test, so the answer is truthful.

Visibility	Gated
Entry condition	verification_case
Design intent	Identity verification: document, face match, liveness.
Owned by	POS-TAL-VER

IDV-01 · SINGLE SELECT · REQUIRED

Document type

ON SCREEN

If your documents were lost, choose the last option. There is a route for you.

OPTIONS: National identity card, Passport, Driving licence, Family record with head-of-household document · **RULE:** One value. The fourth option opens the alternative route. · **WRITES TO:** verification_case.doc_type

Why we ask — Conflict displaces documents. A single-document requirement excludes exactly the people we exist for.

IDV-02 · FILE UPLOAD · REQUIRED

Document images

ON SCREEN

We check the image quality here and now, so you are never waiting days to be told it was blurry.

OPTIONS: Front and back, or the photo page · **RULE:** JPEG, PNG or PDF. Glare, blur, crop and edge detection run in the browser before upload is accepted. · **WRITES TO:** verification_case.doc_refs

IDV-03 · SHORT TEXT · REQUIRED

Document number

OPTIONS: Free text, masked after entry · **RULE:** Checksum validated where the format allows. · **WRITES TO:** verification_case.doc_number

IDV-04 · DATE · REQUIRED

Document expiry

OPTIONS: Date picker, or None · **RULE:** Not in the past unless the type has no expiry. · **WRITES TO:** verification_case.doc_expiry

IDV-05 · CAMERA · REQUIRED

Live capture

ON SCREEN

This one has to be taken now, on camera. Look straight ahead in decent light.

OPTIONS: In-browser capture with framing overlay · **RULE:** Camera only. Gallery upload disabled for this field. · **WRITES TO:** verification_case.selfie_ref

Why we ask — A gallery upload can be any image. A live capture is the point.

IDV-06 · VIDEO · REQUIRED

Liveness challenge

ON SCREEN

A few seconds of video. Follow the prompt on screen.

OPTIONS: Short recorded sequence with a randomised prompt · **RULE:** Randomised prompt. Retry permitted
PH-LIVENESS-TRIES times. · **WRITES TO:** verification_case.liveness_ref

Why we ask — Defeats a printed photograph or a screen held to the camera.

IDV-07 · SYSTEM · OPTIONAL

Face match result

OPTIONS: Automatic comparison of PRF-14, IDV-02 and IDV-05 · **RULE:** Score above **PH-FACE-AUTO** auto-passes. Below it, a human reviews. Never an automatic rejection. · **WRITES TO:** verification_case.face_score

Why we ask — A machine may pass someone. Only a person may fail them.

IDV-08 · CONDITIONAL GROUP · OPTIONAL

Alternative attestation

ON SCREEN

We will call the person who attests for you. Please tell them to expect it.

OPTIONS: Attesting authority, relationship, contact, signed attestation upload · **RULE:** Shown only when IDV-01 is the fourth option. Always human reviewed, never automated. · **WRITES TO:** verification_case.attestation

Why we ask — The route that keeps the displaced inside the system.

IDV-09 · SYSTEM · OPTIONAL

Screening

OPTIONS: Sanctions and politically exposed person screening · **RULE:** Any hit suspends the case and routes it to POS-COUNSEL. Never auto-rejected. · **WRITES TO:** verification_case.screening_result

Why we ask — A legal obligation and a partner requirement.

S10 The rules

Rate expectation, collected privately and never shown to anyone else, so the person answers without posturing.

Visibility	Gated
Entry condition	consent_record
Design intent	Explicit, itemised, separately recorded consent.
Owned by	POS-COUNSEL

CNS-01 · CONSENT CHECKBOX · REQUIRED

Code of Conduct

OPTIONS: Full text on screen, scroll tracked, downloadable · RULE: Separate tick. Version and timestamp recorded. ·

WRITES TO: consent_record.code_of_conduct

Why we ask — Bundled consent is not consent. Each is separate and separately withdrawable.

CNS-02 · CONSENT CHECKBOX · REQUIRED

Talent Engagement Terms

ON SCREEN

You are independent. This is not employment, and the terms say exactly what it is.

OPTIONS: Full text, scroll tracked, downloadable · RULE: Separate tick. Version recorded. · WRITES TO: consent_record.engagement_terms

Why we ask — Defines the independent relationship, obligations and payment terms.

CNS-03 · CONSENT CHECKBOX · REQUIRED

Privacy Notice

ON SCREEN

We say what we keep, why, and for how long. You can ask us to delete it.

OPTIONS: Full text, scroll tracked, downloadable · RULE: Separate tick. · WRITES TO: consent_record.privacy

Why we ask — States what is collected, why, for how long, and how to have it erased.

CNS-04 · CONSENT CHECKBOX · REQUIRED

Identity data handling

ON SCREEN

*Your document images are deleted **PH-DOC-RETENTION** after verification closes. Only the outcome is kept.*

OPTIONS: Specific to biometric and document data · **RULE:** Separate tick. Retention period stated in the label itself. ·

WRITES TO: consent_record.biometric

Why we ask — Biometric data warrants its own consent, not a line inside a longer notice.

CNS-05 · CONSENT CHECKBOX · REQUIRED

Safeguarding standard

OPTIONS: Full text, scroll tracked · **RULE:** Separate tick. · **WRITES TO:** consent_record.safeguarding

Why we ask — Non-negotiable and enforced without exception.

CNS-06 · CONSENT CHECKBOX · REQUIRED

Originality declaration

ON SCREEN

Work you send is yours. Where you used a machine to help, you say so. That is all we ask.

OPTIONS: Explicit statement covering reuse and machine generation · **RULE:** Separate tick. · **WRITES TO:** consent_record.originality

Why we ask — The integrity rule that protects every other talent in the registry.

CNS-07 · CONSENT CHECKBOX · OPTIONAL

Public profile consent

ON SCREEN

Say no if you prefer. It changes nothing about your application.

OPTIONS: Optional, separately withdrawable · **RULE:** Optional. Refusal does not affect the application. · **WRITES TO:** consent_record.public_profile

Why we ask — Consent that cannot be refused is not consent.

CNS-08 · CONSENT CHECKBOX · OPTIONAL

Contact for opportunities

OPTIONS: Optional, channel specific · **RULE:** Optional, per channel. · **WRITES TO:** consent_record.marketing

S11 Show us

The choice to give back. The volunteer track is offered here, with what it is and what it earns, and it is genuinely optional.

Visibility	Gated
Entry condition	assessment_attempt
Design intent	The practical assessment. The single most important screen.
Owned by	POS-TAL-ASM

ASM-01 · READ ONLY · REQUIRED

Assessment briefing

ON SCREEN

You will see the exact rubric we score against. There are no hidden criteria.

OPTIONS: Task, time allowed, what is assessed, what is permitted · RULE: Acknowledged before the timer starts. · WRITES TO: assessment_attempt.briefed_at

Why we ask — Assessment anxiety produces false negatives. Transparency removes it.

ASM-02 · READ ONLY · REQUIRED

Rubric preview

OPTIONS: The full scoring rubric for the specialisation · RULE: Displayed in full before the task begins. · WRITES TO: static.rubric

Why we ask — A hidden rubric tests guessing. A published rubric tests capability.

ASM-03 · SINGLE SELECT · REQUIRED

Choose your task

ON SCREEN

Pick the one closest to work you actually do.

OPTIONS: Two or three tasks within the specialisation · RULE: One value. Locked once started. · WRITES TO: assessment_attempt.task_id

Why we ask — Choice reduces the chance that a single unfamiliar brief misrepresents real capability.

ASM-04 · ACTION · REQUIRED

Start when ready

ON SCREEN

The clock starts when you press start, not before.

OPTIONS: Explicit start, timer visible · **RULE:** Timer begins on this action, not on page load. · **WRITES TO:** assessment_attempt.started_at

Why we ask — Nobody should lose time to a slow connection.

ASM-05 · FILE OR TEXT · REQUIRED

Submission

ON SCREEN

We save as you go. If your connection drops, come back and continue.

OPTIONS: Per task definition · **RULE:** Auto-saves every PH-AUTOSAVE . Late submission accepted and flagged rather than voided. · **WRITES TO:** assessment_attempt.submission_ref

Why we ask — A dropped connection must never destroy an hour of work.

ASM-06 · LONG TEXT · REQUIRED

Approach note

ON SCREEN

Tell us how you approached it and what you would do differently with more time.

OPTIONS: Free text, 100 to 800 characters · **RULE:** Minimum 100 characters. · **WRITES TO:** assessment_attempt.approach_note

Why we ask — How someone reasons is more predictive than what they produced.

ASM-07 · SINGLE SELECT · REQUIRED

Assistance declaration

ON SCREEN

Using a machine is fine and it is normal. Hiding it is not.

OPTIONS: No assistance, Machine assistance with disclosure, Reference material only · **RULE:** One value. Disclosure is never penalised. Concealment is a sanction. · **WRITES TO:** assessment_attempt.assistance

Why we ask — We are not against tools. We are against concealment.

ASM-08 · SYSTEM AND HUMAN · OPTIONAL

Scoring

OPTIONS: Rubric scored by POS-TAL-ASM, moderated on a sample by POS-TAL-LEAD · **RULE:** Score under PH-SCORE-T1 triggers one retake after PH-RETAKE-WAIT . · **WRITES TO:** assessment_attempt.score

Why we ask — One assessor is an opinion. A moderated sample is a standard.

ASM-09 · SYSTEM · OPTIONAL

Feedback to the applicant

ON SCREEN

Whatever the result, you get the scoring sheet and what would move it.

OPTIONS: Written feedback against each rubric line, released on outcome · **RULE:** Released whether the outcome is pass or fail. · **WRITES TO:** assessment_attempt.feedback

Why we ask — A rejection that teaches nothing wastes the applicant's effort and our reputation.

S12 Talk to us

The agreements. Plain-language terms, each one explained in a sentence, each accepted deliberately rather than in one blind tick.

Visibility	Gated
Entry condition	interview_booking
Design intent	Book and hold the verification interview.
Owned by	POS-TAL-VER

INT-01 · CALENDAR · REQUIRED

Choose a slot

ON SCREEN

Pick a time that suits you. Rescheduling is fine, just tell us before.

OPTIONS: Slots from the verification team calendar, applicant time zone · RULE: At least PH-INT-NOTICE notice. Rescheduling permitted PH-INT-RESCHED times. · WRITES TO: interview_booking.slot

INT-02 · SINGLE SELECT · REQUIRED

Interview channel

ON SCREEN

If your connection is weak, choose voice. It does not disadvantage you.

OPTIONS: Video call, Voice call, In person at the Kayan Hub · RULE: One value. In person only offered where residence is Aden. · WRITES TO: interview_booking.channel

Why we ask — Bandwidth is not evenly distributed. A video-only policy excludes.

INT-03 · SINGLE SELECT · REQUIRED

Interview language

ON SCREEN

Answer in the language you think in.

OPTIONS: Arabic, English · RULE: One value. · WRITES TO: interview_booking.language

INT-04 · READ ONLY · REQUIRED

What to expect

ON SCREEN

*Two of us, about **PH-INT-MINUTES** minutes, four questions. No trick questions.*

OPTIONS: Structure, duration, who attends, what is scored · **RULE:** Displayed at booking and resent before the slot. ·

WRITES TO: static.interview_brief

INT-05 · SYSTEM · OPTIONAL

Interview record

OPTIONS: Two independent scores against the published rubric, plus notes · **RULE:** Two scorers required. A gap above **PH-INT-GAP** triggers moderation. · **WRITES TO:** interview_record

Why we ask — A single interviewer's impression is not evidence.

S13 People who know your work

The review pause. The person has done their part; we tell them exactly what happens next and how long it takes.

Visibility	Gated
Entry condition	reference_request
Design intent	Reference collection, requested by Kayan not the applicant.
Owned by	POS-TAL-VER

REF-01 · REPEATING GROUP · REQUIRED

Referee details

ON SCREEN

Someone who managed or commissioned your work. Not a friend, not a relative.

OPTIONS: Name, organisation, role, relationship, email, phone · RULE: Minimum two. Personal relatives rejected. Same-domain email as the applicant flagged. · WRITES TO: reference_request

REF-02 · SINGLE SELECT PER REFEREE · REQUIRED

Which work they can speak to

OPTIONS: Linked to a submitted artefact, or General · RULE: Per referee. · WRITES TO: reference_request.artefact_link

Why we ask — Anchors the reference to something concrete rather than a character statement.

REF-03 · CHECKBOX PER REFEREE · REQUIRED

Permission to contact

ON SCREEN

We will contact them directly. Please tell them to expect us.

OPTIONS: Explicit · RULE: Per referee. · WRITES TO: reference_request.consent

REF-04 · SYSTEM · OPTIONAL

Reference collection

OPTIONS: Kayan contacts the referee directly. The applicant never handles the response. · RULE: Structured form plus a call.

PH-REF-CHASE reminders, then the applicant is asked for an alternative. · WRITES TO: reference_response

Why we ask — A reference the applicant carries is not a reference.

S14 Where you stand

The profile is live. The first thing the person sees after acceptance — what they can now do, and what the next tier would open.

Visibility	Gated
Entry condition	application_status
Design intent	A live, honest status tracker. No silent queues.
Owned by	POS-TAL-SUP

STA-01 · READ ONLY · REQUIRED

Status tracker

ON SCREEN

You can always see exactly where you are and what happens next.

OPTIONS: Every stage with state, owner position and expected date · RULE: Live. Updates on every state change. · WRITES TO: application_status

Why we ask — Silence is what makes applicants give up. Every stage is visible.

STA-02 · ACTION LIST · REQUIRED

What is needed from you

OPTIONS: Outstanding items with a direct link to each · RULE: Sorted by what blocks progress. · WRITES TO: application_status.blockers

STA-03 · ACTION · OPTIONAL

Ask a question

ON SCREEN

A person answers this, not a machine.

OPTIONS: Opens a thread with POS-TAL-SUP, PH-SLA-SUPPORT response · RULE: Threaded, retained on the record. · WRITES TO: support_thread

Withdraw

ON SCREEN

You can stop and have your data deleted at any point.

OPTIONS: Withdraw the application and request erasure · RULE: Two-step confirmation. Erasure executed within PH-ERASURE . · WRITES TO: application_status.withdrawn

Why we ask — A right that is hard to exercise is not a right.

S15 Your space

The working space. Where an accepted person lives with Kayan: their pods, their tasks, their standing, their points.

Visibility	Member
Entry condition	talent_space
Design intent	The permanent home. Where the relationship continues.
Owned by	POS-TAL-LEAD

SPA-01 · DASHBOARD PANEL · OPTIONAL

Standing

ON SCREEN

Here is exactly what would move you up, and what it would take.

OPTIONS: Current tier, each axis level, what the next tier needs · RULE: Live. · WRITES TO: talent_space.standing
Why we ask — Progression must be legible or it is not a ladder.

SPA-02 · PANEL · OPTIONAL

Invitations

ON SCREEN

Everything you need to decide is on the card. No hidden scope.

OPTIONS: Pod invitations with scope, role, dates, hours and indicative value · RULE: Accept or decline within
PH-INVITE-TTL. · WRITES TO: pod_invitation

SPA-03 · PANEL · OPTIONAL

Live pods

OPTIONS: Current pods, milestones, quality gates, the applicant's own tasks · RULE: Links into the delivery workspace. ·
WRITES TO: pod_membership

SPA-04 · PANEL · OPTIONAL

Earnings

ON SCREEN

You can see what is held, what is released and when.

OPTIONS: Accepted milestones, released amounts, held amounts, expected dates · **RULE:** Reconciled to the finance ledger nightly. · **WRITES TO:** payout_ledger

Why we ask — Payment opacity is the reason freelancers distrust intermediaries.

SPA-05 · PANEL · OPTIONAL

Record

ON SCREEN

This is your record. It goes with you.

OPTIONS: Every delivery, acceptance, rating and written feedback · **RULE:** Immutable. · **WRITES TO:** performance_ledger

Why we ask — This record is the asset the talent is building.

SPA-06 · FEED · OPTIONAL

Open calls

ON SCREEN

When something matches you, it appears here first.

OPTIONS: Projects seeking specific specialisations · **RULE:** Filtered by tier and specialisation. · **WRITES TO:** open_call

SPA-07 · PANEL · OPTIONAL

Learning

ON SCREEN

Your assessment told us where the gaps are. Here is how to close them.

OPTIONS: Forge cohorts, the gaps the rubric identified, recommended next steps · **RULE:** Driven by the applicant's own rubric scores. · **WRITES TO:** learning_path

Why we ask — Closes the loop between assessment and the Forge.

SPA-08 · PANEL · OPTIONAL

Community

OPTIONS: Hub events, open sessions, peers in the same specialisation · **RULE:** Opt in. · **WRITES TO:** community_feed

SPA-09 · PANEL · OPTIONAL

Profile and settings

OPTIONS: Edit, re-declare capacity, change payment route, manage consent, export data · **RULE:** Payment route changes require re-confirmation of ownership. · **WRITES TO:** talent_profile

S16 Give back

The pod call. How a real client brief reaches a person, and how they accept or decline it.

Visibility	Member
Entry condition	volunteer_profile
Design intent	The volunteer track, opened as a choice not a default.
Owned by	POS-K4Y-CO

VOL-01 · READ ONLY · REQUIRED

Why volunteer

ON SCREEN

This is not free work for clients. It is our own work for the country.

OPTIONS: What Kayan for Yemen is and what a volunteer actually does · WRITES TO: static.k4y_intro

Why we ask — Volunteering is a civic act, not unpaid labour. The framing has to say so.

VOL-02 · MULTI SELECT · REQUIRED

Interests

OPTIONS: Programme areas from the civic plan · RULE: At least one. · WRITES TO: volunteer_profile.interests

VOL-03 · MULTI SELECT · REQUIRED

What you can offer

OPTIONS: Your registered specialisations plus general support options · RULE: At least one. · WRITES TO: volunteer_profile.offer

VOL-04 · REPEATING GROUP · REQUIRED

Availability for shifts

OPTIONS: Day and time window · RULE: At least one window. · WRITES TO: volunteer_shift_availability

VOL-05 · BOOKING AND COMPLETION · REQUIRED

Safeguarding orientation

ON SCREEN

This one is not optional and there is no way around it.

OPTIONS: Session booking, attendance recorded, refresher scheduled · **RULE:** Mandatory before any shift. No exception. ·

WRITES TO: volunteer_profile.psea_completed

Why we ask — No unsupervised contact of any kind before orientation is complete.

VOL-06 · CONSENT CHECKBOX · REQUIRED

Volunteer agreement

OPTIONS: Full text · **RULE:** Separate tick. · **WRITES TO:** consent_record.volunteer_agreement

VOL-07 · CONSENT CHECKBOX · OPTIONAL

Image consent

ON SCREEN

Say no and we will not photograph you. It changes nothing.

OPTIONS: Optional, separately withdrawable · **RULE:** Optional. · **WRITES TO:** consent_record.image

VOL-08 · SYSTEM · OPTIONAL

Hour logging

OPTIONS: Scan in and scan out at the Hub, or coordinator confirmation for field activity · **RULE:** Written to the hour ledger.

Validated by POS-K4Y-CO. · **WRITES TO:** volunteer_hour_ledger

Why we ask — Hours must be evidenced, not claimed, because they carry value.

S17 Your card

The card. The credential a verified person can show the outside world, and what it proves.

Visibility	Member
Entry condition	card
Design intent	Digital credential, physical card request, verification link.
Owned by	POS-BRD-LEAD

CRD-01 · SYSTEM · OPTIONAL

Digital credential

ON SCREEN

Your card is live the moment your tier is awarded.

OPTIONS: Issued on tier award. Wallet-compatible. · RULE: Immediate on award. · WRITES TO: card.digital

CRD-02 · ACTION · OPTIONAL

Physical card request

OPTIONS: Request, choose collection at the Hub or delivery · RULE: Collection default. Delivery where a route exists. ·

WRITES TO: card.physical_request

CRD-03 · READ ONLY · OPTIONAL

Verification link

ON SCREEN

Anyone can check your card is real. They see your name, photo and tier. Nothing else.

OPTIONS: The public link a client or partner can check · RULE: Signed URL. Rate limited. Every check logged. · WRITES TO: card.verify_url

CRD-04 · PANEL · OPTIONAL

Who checked my card

OPTIONS: Log of verification checks against the card · RULE: Available to the holder as a data-subject right. · WRITES TO: card_verification_log

CRD-05 · ACTION · OPTIONAL

Report lost or damaged

ON SCREEN

Report it and we suspend it straight away, before anything else.

OPTIONS: Report, suspend, request replacement · RULE: Immediate suspension on report. Replacement at

PH-CARD-REPLACE . · WRITES TO: card.status

▪ The message bank

The messages Kayan sends between screens and after them. Same voice, held together as one set so tone never drifts across channels.

NOTIFICATIONS

Trigger	Channel	Message
NT-01	Verification code	Messaging then SMS then voice
NT-02	Welcome and what happens next	Preferred channel and email
NT-03	Resume your application	Preferred channel
NT-04	Identity verified	Preferred channel
NT-05	More information needed	Preferred channel and email
NT-06	Assessment result	Preferred channel and email
NT-07	Tier awarded	All channels
NT-08	Interview confirmation and reminder	Preferred channel
NT-09	Reference request	Email then phone
NT-10	Pod invitation	Preferred channel
NT-11	Milestone accepted and payment released	Preferred channel and email
NT-12	Tier review opened	Preferred channel and email
